

# DOUBLE TAP® Reversible Tapping Block

**EFFICIENT**

Large, reversible D-Handle is raised for added clearance with a closed grip for improved comfort

**DURABLE**

Reinforced nylon construction for strength and durability

**SAFETY**

Offset handle keeps fingers and knuckles away from the strike zone

**CLICK-LOCK**

Use this side (facing down)

**SECURE**

Twist-lock knob secures reversible handle in place

**TONGUE & GROOVE**

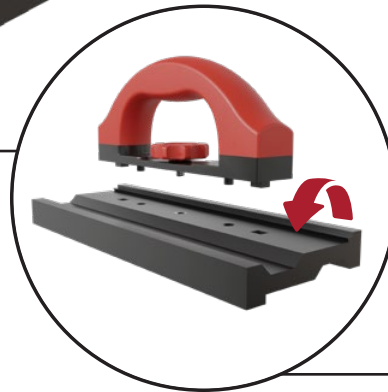

Use this side (facing down)

**LARGER STRIKE AREA**

10" length, 3½" width and ¾" height provides plenty of space to tap with mallet

**REVERSIBLE**

Handle can be attached to either side of block depending on flooring type

US Patent No. 12,188,242

ROBERTS® 10" Double Tap® Reversible Tapping Block is designed to push planks together without damaging the flooring or your fingers. Dual sided, with edges designed for tongue and groove and click-lock floors, this patented D-handle tapping block works with most types of flooring including resilient vinyl tile, laminate and hardwood planks. Robust yet easy to use, the offset handle allows you to secure the flooring in place using a soft-head mallet to tap and connect boards.
